

WELL CAPS

THE TURTLE® VERMIN WATERTIGHT CAP – The Turtle Vermin Watertight Cap is a two-piece cast iron cap that features a Neoprene “O”-ring seal on the well. The top of the cap removes for easy well servicing. Standard WE1-series cap attaches to steel or PVC well casing with three square head bolts. WE1P-series cap for PVC casing attaches by solvent welding (gluing). All models have two large screened vent areas. Stainless steel hardware included. **Conforms to Water System Council PAS-97(04) Standards.** Vermin resistant. Painted green and oven dried to produce a durable high quality finish.

ABS Turtle Cap

Personalized Turtle Caps are available upon request. Personalized Caps (cast into iron cap or hot stamped into ABS cap). Minimum order (per well size) of personalized caps: 50 caps. ± 10% deviation must be allowed on personalized caps.

6WE1 Assembly Cast Iron Turtle Cap
